- 208 or 240 Volts
- 60 Amp breaker required
- 3 Zone Bartlett Controller at NO EXTRA CHARGE
- New Lid Lifter at NO EXTRA CHARGE
- CSA approved

Cone Art BX2322D

The Tucker's Cone Art Kiln model 2322D is the newest kiln in Cone Art's line up and offers all the power of a 2327D in a marginally smaller package. With a 23.5" interior diameter this kiln is suited for 21" diameter shelves, yet with the 22.5" interior height it's just a little easier to reach the bottom. Built with 3 thermocouples and the same power as its 27" deep cousin, this model can easily fire hot, fast, and evenly. Double wall construction keeps energy efficiency high, and our standard element in the floor helps to ensure even firings every time. Just like the deeper models, this kiln easily disassembles into 3 sections for easy delivery. This is an ideal kiln for those who have a challenge reaching the bottom of standard sized kilns.

MODEL	WALL	PHASE	VOLT	INSIDE W x H Dim. in inches	SECTION(S)	CUBIC FEET	AMPS	KILO WATTS	SHIP WT. LBS.
BX2322	D	1	240	23.5 X 22.5	3	5.83	48	11.5	310
BX2322	D	1	208	23.5 X 22.5	3	5.83	55.4	11.5	310

* Bartlett Controller included on all models.

D: Double Wall
