

BX119D

Overview

- **.57 Cubic Feet**
- **2 Years Warranty**
- **Double Insulated Wall**
- **Kanthal A-1 Elements**
- **120 Volts**
- **18 Amps**
- **20 Amp Breaker Required**
- **Plugs into regular outlet**
- **Bartlett Controller**

Product Description

The Tucker's cone Art Kiln Model BX119D is an excellent choice for firing small items such as dolls. This kiln is especially useful as a test kiln since it fires to cone 10 using a regular 120-volt wall outlet.

It is a double insulated kiln with 2 ½" of premium firebrick plus 1" of block insulation. This 3 ½" thick wall saves approximately 30 % in electricity costs and has a safer, cooler outside jacket.

The cone 10 Kanthal A-1 elements are standard.

The jacket and fittings are stainless steel.

The Bartlett electronic controller is mounted on an angled easy view control panel.

There isn't a better-built, more convenient small test kiln on the market today than the Tucker's Cone Art Model BX119D.

Furniture Kit

- **1 - 10" Round Shelves**
- **3 - 1" Posts**
- **1Kg - Kiln Wash**
