- 240 or 208 Volts
- 80 or 90 amp breaker required
- Sectional design
- 3 Zone Bartlett Controller at NO EXTRA CHARGE
- Counter Weight lifter at NO EXTRA CHARGE
- Double wall construction

## Product Description

The Tuckers Cone Art Kiln Model BX4227D is a massive 16.5 cubic feet oval kiln with a full 42" width, 31" from front to back and a 27" depth. The BX4227D is designed for a busy production or sculpture studio. It is a double insulated kiln with 2.5 " of premium firebrick plus 1" of block insulation around the walls. The floor and lid are constructed with 3" firebrick and has an additional 1" of block insulation. The entire kiln, including the lid, is clad in a stainless steel jacket for extra protection and durability.

The extra insulation ensures even firings, stops heat loss through the walls and lid, saves 30% in electricity costs, and lengthens element life.

There are heavy-duty Kanthal A-1 elements in the walls and floor. This kiln makes firing up to cone 10 effortless even with heavy loads.

This kiln is equipped with a counter weight lid lifter and Bartlett electronic controller with 3 Zone Control , panel mounted on an angle for easy viewing. Both features come standard at NO EXTRA CHARGE.

The BX4227D has all the features and more that you need in a professional kiln.

## Furniture Kit

- 3 - 26" x 13" x " Kiln Shelves
- 6 - 26" half Round Shelves
